

Information Security Policy

1. Purpose

Mitsubishi Chemical Corporation (hereinafter referred to as "MCC") and MCC's group companies (hereinafter collectively referred to as the "Group") shall recognize the importance and responsibility of protecting information assets, and strive to prevent reputational damage and business interruption due to information leakage, falsification, etc.

2. Handling of information assets

The Group shall follow the principle to grant only the minimum necessary authority to those who need information assets for their work to ensure the confidentiality of information assets, maintain the accuracy and consistency of information assets to ensure their integrity, and strive to ensure availability by taking measures to ensure that necessary information is available in a timely manner.

3. Compliance with laws, regulations, and contractual requirements

The Group shall comply with relevant laws, regulations, contracts, and internal rules when acquiring, using, and disclosing information assets.

4. Awareness and education

The Group shall conduct regular awareness-raising and education for all members of the Group to ensure rigorous information management.

5. Regular evaluation and continuous improvement

The Group shall conduct regular evaluations of information security risks and perform continuous improvement on countermeasures.

6. Incident response

The Group shall respond appropriately to information security incidents through an incident response system centered on CSIRT, and takes measures to minimize damage, prevent impact on stakeholders, reduce reputational damage, prevent recurrence, etc.
