## **Mitsubishi Chemical Holdings Recognized as Global Leader in Sustainable Water Management**

Mitsubishi Chemical Holdings Corporation

Mitsubishi Chemical Holdings Corporation (MCHC; Head Office: Chiyoda-ku, Tokyo; President: Hitoshi Ochi) has been recognized for the first time as a global leader in sustainable water management and has been awarded a position on this year's Water A List by CDP\*, the non-profit global environmental disclosure platform.

The Water A List is comprised of 73 global companies, and is published alongside similar lists for corporate leadership on climate and forests. MCHC is one of 12 Japanese companies included on the list and the only company designated in its materials category in Japan.

MCHC believes its selection resulted from the efforts to reduce the MCHC Group's impact on water resources by lowering water intake through rigorous reuse of cooling water and improvement of water quality; and its contribution to addressing water resource issues by making water available to regions around the world facing water shortages through its products and services as a water treatment solution provider.

With the aim of fulfilling the Group's vision of realizing *KAITEKI*, which it defines as "a sustainable condition which is comfortable for people, society and the Earth, transcending time and generations," the MCHC Group continually provides solutions for issues facing people, society, and the globe, while offering value to society based on the Group's collective capabilities.

\*CDP is an international non-profit that drives companies and governments to reduce their greenhouse gas emissions, safeguard water resources and protect forests.
